YES, YOU READ THAT RIGHT…

According to the HSRA (Government Website) 88 of the 108 cases settled the first quarter of 2016 were for injuries and deaths due to the flu vaccine, making the flu vaccine the most dangerous vaccine in the U.S., harming and killing more people than all the other vaccines put together.

It's practically guaranteed that mandated vaccinations will affect our kids, our grandchildren, our parents, our friends and loved ones.

It's a horrifying thought, but it's the reality we're facing.

Children's lives are at stake, and they are suffering and even dying due to ignorance and misinformation about what vaccine risks and injuries really are.

OUR MISSION

Our mission is to prevent vaccine injury and death and to promote and protect the right of every person to make informed independent vaccination decisions for themselves and their families.

We will not stop until the entire world is educated and empowered with knowledge exposing the truth about vaccines.

The all-or-nothing dynamic that exists with the vaccine hubbub completely polarized the issue and prevents any reasonable discussion from taking place. Either you accept all of the CDC's recommended 69 doses of 16 vaccines between birth and age 18, or you want to bring back measles, polio, and probably the black plague.
